

Summary

Ambitious Junior Software Developer with hands-on experience building full-stack web applications, eager to grow under technical mentorship while contributing fresh perspectives and proven problem-solving abilities. Demonstrates strong foundation in React and modern frameworks through production-ready solutions, combining recent technical training with extensive experience in system design. Seeking an engineering role that values collaboration and continuous learning, ready to make immediate impact while developing deeper expertise.

Experience

Client Services Coordinator | 02/2024 - Present
Nourish Bridgeport, Bridgeport, CT

- ❖ Manage intake and registration processes for 600+ weekly food pantry visitors
- ❖ Provide bilingual support to ensure clear communication with diverse community members
- ❖ Maintain accurate client database and track visit frequency using gital management systems
- ❖ Coordinate good distribution logistics and inventory management
- ❖ Train new volunteers on registration procedures and cultural sensitivity protocols
- ❖ Implement efficient queue management systems to reduce wait times by 25%

Front-End Software Engineer (Contract) | 11/2023 - 05/2024
La Leche League USA, Remote

- ❖ Spearheaded the development of a responsive admin dashboard using React and Tailwind CSS, improving data visualization and user workflow efficiency by 40%
- ❖ Successfully migrated legacy jQuery components to modern React architecture, improving maintainability and performance
- ❖ Engineered reusable component library of 20+ elements, reducing development time for new features
- ❖ Developed and maintained RESTful API integrations for seamless data flow between front-end interfaces and backend services
- ❖ Designed and implemented MySQL database schema with 15+ tables, establishing efficient relationships and indexes for optimal query performance
- ❖ Implemented data-driven UI components using AppSmith, resulting in a 50% reduction in manual data entry tasks

Customer Service Supervisor | 01/2018 – 07/2022
Sentry Management Solutions, New York, NY

- ❖ Led digital transformation initiatives by implementing and customizing new CRM systems, resulting in 45% improvement in customer response time
- ❖ Designed and implemented a data-driven training program for 100+ agents, resulting in 35% improvement in customer satisfaction scores and 25% reduction in resolution time
- ❖ Architected new quality assurance workflows using data analytics to identify trends and improvement opportunities
- ❖ Created comprehensive documentation and training materials using content management systems
- ❖ Collaborated with IT team to implement and test new software solutions for customer service operations

Education

Software Engineering Bootcamp | 02/2024 to 10/2024
Springboard – Remote

- ❖ Honors Graduate
- ❖ Completed 800+ hours of hands-on technical training in full-stack web development
- ❖ Developed three full-stack applications from concept to deployment
- ❖ Key Coursework:
 - Advanced JavaScript & ES6+ Features
 - Frontend Development (React, Redux, REST APIs)
 - Backend Architecture (Node.js, Express, API Design)
 - Database Design & SQL
 - Data Structures & Algorithms
 - Test-Driven Development
 - Agile Development Methodologies

B.A. Translation and Interpretation | 09/2004 to 06/2008
Azerbaijani University of Languages – Baku, Azerbaijan
